The Uniden GNS 8430 combines the latest in GPS technology and software with Sophisticated Intuitive Technology.

The GNS 8430 is stylish and powerful. It even has an in-built Early Warning Safety System to alert you of fixed speed cameras and red light cameras therefore providing a high level of nationwide protection for loved ones and your license. Featuring the latest SIRF III GPS Chipset for powerful and fast performance, the new GNS 8430 delivers nationwide coverage of all streets, suburbs and points of interest, giving voice and visual guidance to any destination. It comes pre-programmed with over half a million points of interest including restaurants, banks and post offices. Users can also store their own destinations.

For drivers who travel to more than one location in a day, multipoint route planning allows for multiple destinations to be programmed in advance. This allows drivers to go from one map to the next, taking the fastest and most direct route. Predictive keyboard text also reduces the destination search time and if drivers make a wrong turn in a pre-programmed destination, the system will recalculate directions immediately.

The GNS 8430 is TMC Ready (Traffic Monitoring Channel) allowing you to receive broadcast traffic information and automatically diverting you to a faster route. This feature only works if you subscribe to the service by your local TMC provider. The GNS 8430 is so powerful yet so simple to use. Whether you are travelling for work or enjoying a short or long drive to a new destination, the GNS 8430 will guide you there using the quickest route available with its Dynamic Voice and Visual Guidance System. Its Intuitive Technology makes it so simple to use, allowing you to plug it in, enter your destination and just drive... letting the GNS 8430 do the rest.

The screen is super bright, removing glare for crystal clear viewing. It also switches automatically to night mode for easy, glare-free viewing after dark. With superior Mapping Data it provides nationwide coverage using Sensus Whereis Map Data. Featuring a SD Card slot extra memory can be added to the unit and is great for the multi-media function that allows you to play your videos and music. Digital photos can also be viewed from an SD memory card.

When it comes to portable GPS Car Navigation Systems the Uniden GNS 8430 is in a class of its own. It makes your trips safer and faster while giving you peace of mind that you will reach your destination on time, every time.

Suggested Retail: \$469.95
