### Location Sharing UHF Radios Made Possible with Uniden Handheld and In-Vehicle Range

Uniden Australia's range of UHF radios, the XTRAK 50 PRO and XTRAK 80 Pro, promise to keep you connected no matter where you are. From the trusted outdoor adventurer to the lifestyle traveller, these UHF radios offer a reliable and trusted solution for every user.

Both the XTRAK 50 PRO Handheld and XTRAK 80 Pro In-Vehicle take communication to the next level by

offering app-enabled location sharing functionality between a handheld and in-vehicle UHF Radio, a first in the industry. You can easily share the location of the radio through the XTRAK Bluetooth app, which is available for both iOS and Android. It also helps manage your selective calling (Selcall) contacts and additional receive channels, access the settings controls, and send in-app text messages, all from one convenient app.

Talk to a friend or colleague and know exactly where they are, by using the app's advanced positional tracking and location sharing features as part of the XTRAK App on your smartphone when connected to your UHF radio. Whether in another vehicle with the XTRAK 80 Pro or on foot with XTRAK 50 Pro, you'll never be out of contact and always be able to communicate and establish your exact position, as Uniden's location tracking works between the in vehicle and handheld UHF radios, ensuring both locations are accurate.

The XTRAK 80 Pro also has a large, anti-glare OLED display and backlit keypad that is easy to read in any lighting condition. The powerful integrated two-watt speakers and four-level voice enhancers enable maximum sound clarity in noisy environments. Bluetooth connection is available on the XTRAK 80 Pro, connecting to the vehicle's audio speakers.

## Media release

Uniden's innovative one-touch instant replay can record up to six minutes of recently received communications and is available in the in-car and a first in the UHF handheld as well, and the smart key lets you toggle between instant channels, monitor, call tone, quality, or equaliser. The magnetic mount is a quick, easy, and convenient way to hold your speakerphone.

When off the mount, the XTRAK 80 Pro has up to five watts of power and provides up to 18 kilometres of range (dependent on topographical factors) compared to the XTRAK 50 Pro which delivers up to five watts of power and provides up to 17 kilometres of range (dependent on topographical factors). Both devices share some common features such as a large, anti-glare OLED display that is easy to read in any lighting condition. The integrated two-watt speakers and four-level voice enhancers ensure maximum sound clarity in noisy environments.

All units have an impressive standby time of up to 30 hours and the one-touch instant replay functions let you record and replay up to four minutes of recently received communications, so you'll never miss an important message. The first-time instant replay feature is also available on the UHF handheld.

XTRAK 50 Pro and XTRAK 80 Pro UHF radios are designed for use in a wide range of industries and activities making them versatile tools for hikers, campers, and outdoor enthusiasts as they are designed to withstand harsh weather conditions and challenging environments. With their durable construction and weather-resistant design, these radios are built to withstand the elements and provide reliable communication, no matter the conditions. From extreme heat to heavy rain, you can rely on XTRAK radios to keep you connected when you need them the most.

In addition to the XTRAK PRO radios, Uniden is introducing a new Bluetooth headset perfect for adventure-seekers. This headset will provide seamless communication and perfectly complements Uniden's range of UHF radios. It is lightweight, comfortable, and features a high-quality microphone for clear voice transmission.

Uniden's reliability and experience in UHF make the XTRAK 50 Pro and XTRAK 80 Pro ideal for outdoor enthusiasts and adventurers who demand robust, reliable and quality equipment. Both radios offer the finest components, engineering, and styling, just what you would expect from Uniden. Whether you're camping in the great outdoors or travelling off the grid with a group, the XTRAK 50 and XTRAK 80 Pro are the perfect tools to help you stay connected.
