This off-shore radio represents the highest level of quality and performance in marine radios. It is designed to withstand the harshest marine conditions and with it's compact size also saves valuable space. You can selectively call any vessel with a DSC marine radio or normal marine communications with the touch of a button. Also switch between 1 watt output, for close range communication or 25 watt output, to provide full transmission power. The backlit LCD display and keypad is easily viewed, in all conditions. Other features include one touch memory and emergency channel control and scan. Optional extra speaker can be added via the external speaker jack, also a PA speaker for public address.

Suggested Retail: \$349.99
