Keep watch day and night with Uniden's two-in-one camera and spotlight

Exterior lighting can help to better guard the home around-the-clock, illuminating entry ways and acting as a deterrent to would-be thieves. The two-in-one Uniden Guardian App Cam Spotlight camera is the perfect way to maximise lighting when it's needed most. The app enabled HD security camera includes a built-in high-performance LED spotlight to put off unwanted visitors and provide additional security around the home.

With easy set-up and DIY installation, the App Cam Spotlight can be placed on walls or ceilings outside to keep the home protected even when night falls.

Derived from the popular G37xx Series, that also included the two-in-one spotlight camera, the App Cam Spotlight provides a single camera set-up solution.

A multi-position bracket makes positioning easy, while ensuring all the important areas around the outside of the house are guarded. Place the camera to record areas such as the front and back door, pathways, garages, driveways or sheds where valuables are kept. The spotlight camera is built from metal to withstand all weather conditions.

The camera will automatically begin recording when motion is detected, along with triggering the spotlight to turn on like a traditional sensor light. The spotlight will light up a large area, allowing footage to be captured clearly as well as acting as a deterrent. The spotlight will also aid occupants and invited guests to and from the home when surrounding outdoor lighting is poor.

Using the free to download Uniden Guardian Light app, users can view the camera anytime, anywhere via a Smart phone or tablet. Footage can be seen in real-time and users can activate the spotlight if movement looks suspicious. Enabling push notifications, email and sound alerts via the app will notify users if any motion is detected.

The App Cam Spotlight features HD viewing and connects via a local Wi-Fi network. Featuring a wide viewing angle lens, for a greater field of vision, recordings can be stored to 32GB of internal memory ensuring all important footage is captured. Users have the ability to two-way talk in real time through the camera, for easy communication with visitors including couriers.

Durable and weatherproof, the Uniden Guardian App Cam Spotlight is a flexible and convenient DIY home security solution.

Uniden Guardian App Cam Spotlight RRP \$249.95
