Travel the open road with the new Uniden Jump Start Kit

A must have travel companion to campers, road and boat users, the compact Uniden UPP136 acts as roadside assistance and a portable power bank, providing users peace of mind when out and about or when power is unavailable.

With a powerful 13,600mAh portable battery pack and a set of jumper cables, users can supercharge a flat battery whenever required. The UPP 136 is a versatile power pack, charging petrol engines up to 5 litres, diesel engines up to 3 litres as well as mobile phones, tablets and laptops.

Using the UPP 136 to jump start a vehicle is quick and easy, assisting drivers to get safely back on the road in minutes and minimising disruption to other road users. If the problem persists, it's possible to jumpstart most cars multiple times on one charge, allowing the onward journey to continue until the battery can be replaced.

An LED indicator, clearly showing the battery's percentage, helps to plan ahead before long journeys and recharge the device using the AC power adaptor. Charging can also be done on the move with the included cigarette charge cable, ensuring the kit is ready to be used when it's needed most.

The additional power pack functionality provides users with a means of charging tablets, smartphones and laptops, which is vital for staying connected when out on the road for work or leisure. Smartphones and tablets can be charged via the two-in-one USB cable and almost all most brands of laptop can be charged via one of the eight connectors provided. The UPP 136

has a built-in surge and spike protector, limiting the voltage supplied to a connected device, protecting it from any unwanted voltage surges above a safe threshold.

The Uniden Jump Start Kit also includes a powerful LED flashlight which offers users visibility in environments where there is little or no light. The LED torch has three flash modes, which can be used outdoors while camping, for night time vehicle maintenance and in emergency situations to attract attention.

The UPP 136 packs away neatly in the included durable carry case, providing an easy storage solution for any type of vehicle.

Whether it's an outdoor adventure, navigating the daily commute, or taking the boat out at the weekend, drivers won't get caught out on-the-go with the Jump Start Kit UPP136 from Uniden.

Uniden UPP 136 Jump Start Kit and Power Pack RRP \$149.95

Key features and specifications:

- Supports Engines: <5.0L (<3.0L Diesel)
- Battery Capacity: 13,600mAh
