### Put intruders under the spotlight with Uniden's App Cam XLIGHT camera and spotlight in one

For those seeking to improve home security, Uniden's second-generation Guardian camera and spotlight-in-one acts as an additional deterrent to unwanted guests.

The **Uniden App Cam XLIGHT** can act as a standalone WiFi camera or be an extension to selected existing Uniden Wired Guardian home security systems.

Ideally positioned at a property's entry points or near the garage, the App Cam XLIGHT is a Full HD1080P (2MP), weatherproof camera with a motion detection spotlight featuring Thermo Sense Technology. This smart heat sensor detects motion from heat sources, such as people, to avoid common false alarm triggers like curtains or branches moving with the breeze. It also provides users with reliable motion detection notifications sent directly to their free-to-download Uniden app. When motion is detected the spotlight is activated,

The built-in spotlight can be activated manually via the Uniden app to warn off any intruders or act as an additional light source when leaving or arriving home. Users can also trigger a siren, alerting neighbours and passers-by of a potential incident. The camera's two-way talk function further helps residents to communicate with visitors remotely, and in real time, through the built-in microphone and speaker. This is particularly handy when couriers arrive and recipients are away from home, with the ability to provide further instruction regarding the delivery.

Users can view or record footage remotely anywhere in the world, via the Uniden security app. Footage can be stored to an SD card or to the Uniden cloud ensuring important moments are captured and are available for viewing at a later date.
