Wire free 4G Cellular Solar Camera that can be put almost anywhere

Keep watch over valuable property without relying on Wi-Fi or mains power with **Uniden's App Cam Solo 4G** full HD 1080p. Ideal for monitoring building sites, moored boats, driveways, parked caravans and agricultural equipment or livestock, the wire free camera relies on SIM based connectivity and a rechargeable battery for non-stop power when used with the optional Uniden Solar Panel accessory. The app enabled smart security camera provides a flexible surveillance solution to check in remotely from anywhere at any time with no interruptions.

Users simply connect to 4G via a SIM card using a data plan of their choice, allowing the Uniden App Cam Solo 4G to be installed and operated in areas where a Wi-Fi connection is unavailable. Suitable to use in any scenario, the security camera has been specifically designed for remote locations including farms and rural properties, as well as work and leisure settings, such as marinas and holiday parks. The camera's contemporary weatherproof design allows positioning outdoors and indoors, with a camouflage silicon sleeve providing added protection.

The new App Cam Solo 4G includes a large capacity 7800mAh rechargeable battery, which can be topped up during daylight hours with the Solar Panel accessory to help maintain power 24/7. The camera offers up to 90 days of standby time thanks to its advanced power-saving technology. Users can view footage remotely via the free Uniden Solo app, which also sends intelligent alerts and push notifications when motion is detected. Capture

footage can be stored via the Uniden Cloud backup or direct onto an SD card. The camera features

Thermo Sense Technology, a heat sensor, eliminating false notifications from surrounding trees or branches.

A siren alert can be activated to act as an additional deterrent to startle unwanted visitors, while the Two Way Talk function allows communication through the built-in mic and speaker to direct couriers, visiting trades or guests.

With a 110-degree wide viewing angle and Starlight Night Vision, the App Cam Solo can record or live stream sharp, clear footage capturing more detail at night and in low light conditions without additional lighting infrastructure.

App Cam Solo 4G Solar Panel Kit RRP \$649.95
