Range Brochure PDF

Operating Manual PDF

Introducing the cordless phone ideal for the hearing impaired, those with visual problems, noisy homes and workplaces or even quiet areas. Uniden has carved out another niche for itself in the cordless telephone market with the release of its "special series phone". The new SS E15 + 1 cordless phone features an extra loud ringing volume and bright red visual ringer making it ideal for the visually or hearing impaired.

Recognising the importance of telecommunication among the elderly or those who may be visually or hearing challenged, the SS E15 + 1 is designed to overcome the limitations of making and receiving calls on a regular handset. In addition to its distinctive red ringer the SS E15 + 1 features a large backlit keypad for easy dialing. It also includes an audio boost and manual volume controls on the handset.

Audio Boost & Volume Control (On Handset)

Visual Ringer Control

Ringer Tone, Sliding Ringer Volume, & Ringer on/off Switch

Ideal for use in quiet areas the new cordless phone can be programmed for silent operation. The flashing red handset and base alerts users to incoming calls. This 2.4GHz phone system utilises Uniden's Sound Clarity & Range technology to deliver clear sound that is compatible with hearing aids. Offering the essentials, the special series phone includes caller ID display, 30 caller ID memories, built-in pager and a super chat battery with lots of talk time.

Suggested Retail: \$129.00
