[Range Brochure PDF](#)
[Operating Manual PDF](#)

This Desktop scanner with Trunktracker III "Trunking Radio Trace Technology" offers 250 programmable memory channels - 12 bands. Offering the new Ground Breaking Technology "Close Call RF Capture Technology" this scanner automatically "Listens" for any nearby or "close" transmissions and once they occur the scanner immediately tunes in to this frequency which is ideal for use at events or locations when the transmission is unknown. The UBCT-9 now comes with the addition of an Australian Scanner Frequency CD and the Software CD.

Frequency ranges received are 25-512, 806-956 and 1240-1300MHz. Chain searching allows seven different personal search bands and the ability to search up to all five chain locations at once. Priority scanning allows a designated priority channel to be monitored every two seconds.

The UBCT-9 also has Pre-Programmed service search which automatically detects analogue Police channels, Railroad, Air, Marine, UHF CB and AM CB. Also includes 1x Telescopic Antenna, 1x Window Mount Antenna, 1x AC Adaptor, 1x DC Power Cord, 1x Mounting Bracket, 1x Cigarette Lighter Cord, 1 X Australian Scanner Frequency CD and 1 X Software CD.

Suggested Retail: \$399.95
