

Uniden releases 2.5K indoor pan and tilt smart camera to keep watch at any angle

Uniden has released its latest indoor smart camera, the **Guardian App Cam HOME+**, with 2.5K video resolution and 3x optical zoom.

A 2.5K (5MP) camera provides the ability to see your home surroundings in the finest detail with Super HD that is clearer than a 1080p camera. With pre-motion recording, the Guardian App Cam HOME+ can start recording four seconds before motion is detected, providing footage of the whole event from beginning to end.

With a new and contemporary design, the App Cam HOME+ can be placed in any room and is ideal for open plan living areas. Its 355-degree pan and 50-degree tilt rotation provides greater flexibility and a wider viewing area. The App Cam Home + has 3 X Optical Zoom to zoom into more detail if needed when accessing the camera.

The App Cam HOME+ is easy to set up and simply plugs in to power, connecting to the dual band WiFi (2.4GHz / 5GHz) for a reliable and continuous connection. Record and view footage with exceptional clarity, securely accessed from anywhere in the world via the dedicated Uniden Solo app. Multiple devices can be used throughout the home, upstairs and downstairs, and centrally viewed and controlled via a smart device.

Compatible with Hey Google and Alexa for effortless voice control, the indoor pan and tilt smart camera also offers two-way talk, enabling real-time conversations with family members and furry animal friends remotely at any time.

For peace of mind, the Guardian App Cam HOME+ operates with smart functionality that can use privacy masking to black out areas within the camera's view that you do not want to be recorded. In addition, it has an inbuilt siren alert trigger to deter unwanted visitors and night vision to view footage in low light as activity happens, with instant app push notifications and emails which can be set up according to preference.

By adding a micro-SD card, and with the benefit of the included seven days of free rolling cloud back up, the Uniden App Cam HOME+ can provide dual backup and has no hidden, ongoing storage costs. The new App Cam HOME+ is compatible with Uniden's newly released NVR wired security systems.

Key features:

- 2.5K (5MP) Super HD
