Wire free 4G Cellular Solar Camera makes security monitoring for boat owners easy

Keep watch over moored fishing boats, cruisers and yachts at the marina without relying on Wi-Fi or mains power using **Uniden's App Cam Solo 4G** full HD 1080p camera. Ideal for monitoring activity around the jetty and ensuring onboard valuables are safe, the wire free camera relies on SIM based connectivity and a rechargeable battery for non-stop power when used with the optional Uniden Solar Panel accessory.

The app enabled smart security camera provides a flexible surveillance solution, with the ability to check vision remotely from anywhere at any time via a smart device.

The Uniden App Cam Solo 4G, allows users to connect to 4G through a sim card and data plan of choice and install the surveillance camera in areas where Wi-Fi connection is unavailable. Featuring a new contemporary and waterproof design, the camera can be positioned outdoors and indoors, with a camouflage silicon sleeve providing added protection.

Monitor boats and yachts 24 hours a day, seven days a week with the App Cam Solo 4G's large capacity 7800mAh rechargeable battery, which can be topped up during daylight hours with the Solar Panel accessory to help maintain continuous power.

The camera offers up to 90 days of standby time thanks to its advanced power-saving technology. Users can view footage remotely

via the free Uniden Solo app, which also sends intelligent alerts and push notifications when motion is detected. Captured footage can be stored via the Uniden Cloud backup or direct onto an SD card. The

camera features Thermo Sense Technology, a heat sensor that eliminates false notifications from surrounding trees or branches.

A siren alert can be activated to act as an additional deterrent to startle unwanted visitors, while the Two Way Talk function allows communication through the built-in mic and speaker to visiting trades or guests.

With a 110-degree wide viewing angle and Starlight Night Vision, the App Cam Solo can record or live stream sharp, clear footage capturing more detail at night and in low light conditions without additional lighting infrastructure.

App Cam Solo 4G Solar Panel Kit RRP \$649.95
