

### Uniden shines spotlight on outdoor security with new App Cam Solo PRO

Uniden has expanded its App Cam Solo security range with the new **App Cam Solo PRO**, a 100% wire-free, rechargeable, solar powered, spotlight and security camera in-one, available in stores February 2021. The compact device can be placed anywhere around the home exterior to keep watch day and night.

Designed for Australian homes and weather conditions, the App Cam Solo PRO can withstand exposure to the elements to continuously and reliably capture footage with a 120-degree wide viewing angle. The addition of the spotlight allows users to better see the appearance of anyone approaching the property, while also acting as an effective deterrent to unwanted visitors.

The Full HD 1080p resolution delivers exceptional clarity. The Starlight CMOS sensor, together with the built-in spotlight, adds colour to the night vision footage up to 10 metres away to ensure a high-quality image. The optional Uniden Solar Panel can be used alongside the camera, positioned for optimal sunlight exposure. The solar panel recharges the App Cam Solo PRO, while providing non-stop power during daylight hours, allowing footage to be recorded and viewed without the risk of draining the battery.

Users can easily facilitate contactless delivery to their home. The Uniden App Cam Solo PRO provides visual verification of when items are at the door, with the added benefit of two-way talk to provide further instruction to couriers, trades and other visitors. Users can seamlessly integrate the App Cam Solo PRO into their existing smart home setup. It features innovative customised voice alerts, which will broadcast when motion is detected.

Live and recorded footage can be viewed using the Uniden SOLO App via a smart device, securely accessed from anywhere in the world. Footage can be stored directly to SD card or the Uniden Cloud ensuring important moments are captured and available to replay when required. The camera also has privacy masking to black out areas within the camera's view that users do not want recorded.

The camera includes all the App Cam features, such as Thermo Sense Technology detecting body heat and movements for minimum false alerts, two-way talk functionality, intelligent alerts and notifications and remote viewing.

Importantly, Uniden offers free seven days of free rolling cloud backup for the lifetime of this product, so there are no hidden costs with subscriptions. If more is needed, it's easy to upgrade to a higher plan with any product in the App Cam Solo range.
