

### **Uniden expands App Cam range including Australia's first outdoor wire-free pan and tilt security camera**

Uniden has added three new models to its home security range including Australia's first completely wire-free, pan and tilt, rechargeable, solar powered, home security camera, called the Guardian **App Cam Solo PT**.

The weatherproof, Full HD 1080p App Cam Solo PT has an ultra-wide viewing angle, alongside its 355-degree pan and 140-degree tilt design, providing greater flexibility when installing and positioning around the home.

The camera can be moved remotely via the Uniden app, which makes it an ideal solution for users that need to cover all angles. One camera can keep watch over the front and side of the house rather than using a conventional fixed camera solution, which would require two cameras to monitor the same area.

The included Uniden Solar Panel can be used alongside the camera and effortlessly positioned for optimal sunlight exposure. The solar panel recharges the App Cam Solo PT, while providing non-stop power during daylight hours, allowing footage to be recorded and viewed without the risk of draining the battery.

Users can seamlessly integrate the App Cam Solo PT into their existing smart home setup. It features innovative customised voice alerts, which will broadcast when motion is detected.

It includes all the App Cam Solo+ features, such as Thermo Sense Technology detecting body heat and movements for minimum false alerts, Two Way Talk functionality, intelligent alerts and notifications and remote viewing. It also offers Starlight Night Vision, an advanced technology delivering night vision footage with more clarity and clearer vision.

Footage can be stored directly to SD card or the Uniden Cloud ensuring important moments are captured and available for replay when required. Users receive seven days of free cloud backup with the option of upgrading to a higher plan.

Also new to the Uniden surveillance line up is the **App Cam Solo Bullet**. This rechargeable, wire-free Full HD camera has a traditional camera design and acts as a powerful deterrent for unwanted guests. The Solo Bullet includes all features of the Solo+ camera range, with voice control and a solar panel for continuous power supply.

Users can seamlessly control the wire free range of App Cam Solo cameras via the same free-to-download Uniden SOLO app.

Further expanding the range is Uniden's **App Cam FloodLight**. The Full HD 1080P, weatherproof App Cam FloodLight is a powered camera and floodlight in one. Featuring a bright 2,500 lumens light source, the light can be dimmed via the app to suit its environment. It has a 135-degree viewing angle, providing a greater area of visibility around the home.

Night vision enables a viewing distance of up to 10 metres, and up to 30 metres when the floodlight is activated. The camera connects to Wi-Fi, allowing remote access from anywhere in the world using the app, and also features voice control functionality. The additional benefit of Thermo Sense Technology will intelligently alert a user when heat and movement has been detected.

Uniden's new range of security cameras are designed for Australian homes and backed with two-year local warranty.

**Key features:**

- Full HD 1080p
- Completely wire free (App Cam Solo PT and Bullet)
- Solar power compatible (App Cam Solo PT and Bullet)
