

Uniden releases the ultimate in Smart Baby Monitors

Uniden has introduced the new flagship model for its award-winning Baby Watch baby monitor range, the Uniden Baby Watch BW5151R. This monitor offers parents high-tech features to keep an eye on newborns and toddlers from anywhere around the home.

The **Uniden BW5151R** baby monitor features smart, Wi-Fi enabled Full High Definition (1080P) camera with dual mode functionality, allowing remote viewing via a smartphone or tablet, as well as on the included 5" HD Monitor. Parents can easily watch secure live footage via the five-inch colour screen monitor from another room, or parents who travel can check in while they're away using the dedicated Baby Watch Plus App.

The BW5151R also includes a pan and tilt camera which can be controlled using the display screen, or remotely through the Baby Watch Plus App, to change the viewing angle and capture every corner of the room. It is easy to set up and can be effortlessly moved from room to room. The BW5151R comes with a cute removable, silicone cover in the shape of a rabbit to help the camera blend into the nursery.

For extra peace of mind, motion and sound detection can sense if babies make noise or wake from a nap, automatically sending an alert to the user's device. The baby monitor has Room Temperature Display and Room Humidity Display with alerts through the monitor and includes high-quality night vision, which is automatically enabled when darkness is detected for a better view of the baby in the evening or early morning.

The BW5151R is compatible with Google Assistant and Alexa for easy integration with a smart home setup. The selection of lullabies (plus white noise) and two-way talk capability allows parents to soothe an unsettled baby remotely through their smart device, putting Uniden's Baby Watch range in a class of its own.
