Capture little moments from any angle with a new smart baby monitor from Uniden

Uniden has expanded its award-winning¹ Baby Watch range of baby monitors with a flagship two-in-one monitor. The premium wireless two-in-one monitor features the popular 'handy clamp' camera, a pan and tilt camera, and many other advanced and practical features which make the Baby Watch range ideal for parents and caregivers of babies and toddlers.

Designed to be exceptionally easy to set-up and use, the new Baby Watch model can be taken out of the box and ready to go in a matter of minutes.

With two-in-one functionality, the BW3451R+1 is a standalone baby monitor that provides interactive opportunities thanks to a dedicated Baby Watch app, accessible via iOS and Android smartphone and tablet devices. A pan and tilt camera lets users control pan, tilt and zoom both manually and remotely via the Baby Watch app. The app also gives parents the ability to talk to their baby at any time through their smartphone.

Unique to the market is the inclusion of an adjustable clamp-style camera. This can be easily and securely positioned anywhere within the nursery for uninterrupted visual monitoring, peace of mind and a perfect visual of baby.

A large 4.3 inch colour screen with video and audio display produces crystal clear viewing and listening, while the infrared night vision provides around-the-clock monitoring. Other useful features include a

built-in nightlight and a selection of lullabies to help soothe bub to sleep while a built-in microphone

¹ Flagship Uniden Baby Watch baby monitors have been voted as the most popular baby monitor by *Mother & Baby* in 2016, 2015 and 2012 (models BW3451R, BW31xx series and BW2101, respectively).

lets parents hear when their child may need attention. A walkie talkie function enables parents to communicate with people in other areas of the home while tending to their child.

For those seeking a more advanced solution, up to four additional cameras can be supported on the BW3451R+1. Parents can also view up to four cameras on the one screen and record up to 32 gigabytes of footage off multiple cameras simultaneously onto a micro SD card.

The BW3451R+1 model features a temperature display with a temperature range alert which notifies parents or caretakers of sudden changes to comfort levels in the nursery. All Uniden Baby Watch baby monitors have a digitally encrypted signal to ensure a secure connection.
