### Ease anxiety when leaving pets at home with a pet monitoring device

Spending more time at home with pets has been one of the few benefits of social distancing measures enforced due to coronavirus. Australians are known to hold one of the highest rates of pet ownership, and this has only increased due to the coronavirus, with RSPCA NSW already seeing a 30% increase in pet adoption compared to 2019.<sup>1</sup> However, as restrictions lift and pet owners return to work, they may experience guilt about

leaving their pets home alone. The **Uniden App Cam Solo+** and **App Cam Solo PT** are perfect monitoring solutions that will ease the stress of wondering what pets are up to at home, allowing owners to stay connected throughout the day.

#### Setting up the home

Whether it's an inquisitive interest or checking for misbehaviour, the App Cam Solo+ and App Cam Solo PT allow users to monitor their pets' activity. Both are wire-free security camera solutions, and easy to install as they do not require any cables or access to a power source. The App Cam Solo+ can be placed in different zones of the home depending on where the pet spends most of its time. The App Cam Solo PT is an ideal solution for pets kept in the backyard, with an ultra-wide viewing angle, as well as 355-degree pan and 140-degree tilt design, providing greater flexibility when installing and positioning around the home.

#### Keep watch from anywhere

Footage of furry and feathered friends is recorded and viewed in Full HD 1080p and can be accessed from anywhere in the world via the dedicated Uniden app. With optional app push notifications when motion or sound is detected, users can be reassured their pets are safe and sound while at work or on holiday. Both cameras offer two-way talk in real time, so pets can be disciplined remotely if they are caught on camera chewing cables, scratching the couch, barking or digging holes in the yard.

### **Flexible and compatible**

Footage can be stored directly to SD card or the Uniden Cloud ensuring important, funny or cute moments are captured and available to replay. Pet owners can also access images remotely for sharing via smart devices or social media. The App Cam Solo+ and App Cam Solo PT are compatible with Alexa and Google Assistant, allowing pet owners to view footage using voice control, ready to be replayed and enjoyed on a smart TV, phone or tablet.

### **Outdoor monitoring**

The App Cam Solo+ is both an indoor and outdoor camera, so pet owners can set up monitoring wherever their pet spends the most time. It's also possible to have multiple cameras accessible via one central app, with twin, triple and quad packs available. The App Cam Solo PT is a weatherproof, outdoor-only camera, perfect for watching over large backyards. The camera can be moved remotely via the Uniden app to cover all angles. One camera can keep watch over the entire backyard, removing the need to use multiple cameras. Starlight Night Vision delivers night vision footage with a clear image, ideal for checking on sleeping pets.

### **7 days free cloud backup**

All products in the App Cam Solo range come with seven days of free cloud backup for the life of the product, including up to 1GB of storage, with the option of upgrading to a higher plan if required.

**Uniden App Cam Solo+ single RRP \$279.95**

**Uniden App Cam Solo PT Kit (includes solar panel) RRP \$369.95**
