

April 2019

Large screen and USB Charging, the Ultra Compact UHF CB mobile that suits any work or recreational vehicle

For those operating trade machinery and agricultural vehicles, the new **Uniden UH5030 UHF CB mobile radio** is a compact communication solution, keeping colleagues seamlessly connected throughout the day.

Designed and engineered in Japan, the UH5030 radio provides users with clear, uninterrupted radio transmission from 80 UHF channels. With a 12v and 24v connection available, it can also be installed into any vehicle, or kept in a shed or warehouse for handy communication on large properties and commercial sites. A built-in 5V USB charge port is located at the front of the unit, allowing users to easily charge mobile devices or tablets through the UHF radio when operating vehicles without this functionality.

Tradespeople and field workers can operate the UH5030 unit with ease and minimal distraction. Using the large LCD screen with four-way integrated buttons, users can effortlessly scan, select channels and adjust volume. For vehicles with limited dash space, the LCD screen can be flipped to provide a reverse mounting option.

Voice transmissions are clearer, more natural and easier to understand including built-in voice enhancer technology and four different audio level settings (normal, bass, midrange and high) to ensure the information can be heard first time, without being misunderstood.

\$229.95 RRP
