### **Long distance driving made effortless with Uniden's new CB radio**

Life on the road will become easier for long distance travellers and explorers throughout Australia with the DIN-Size 5-watt UH9050 UHF CB mobile radio from Uniden.

Built for tough Australian conditions, and featuring a distinctly contemporary style, the radio is powered with 12/24 voltage which is suitable for any vehicle type. Users can be confident messages won't be lost in communication with the use of the instant replay function that can record and replay up to one minute of recently received signals.

With 50 years of global excellence and the world's leader in wireless communication, the Uniden UH9050 will allow drivers to communicate effortlessly while on the road with innovative features such as Smart Mic, Master Scan® and a built-in scanner, making the UH9050 more than just a radio.

Smart Mic technology features on the heavy-duty speaker microphone allow users to simply push a button to switch between 100 user-programmed channels, the voice enhancer, call tone and SELCALL.

Master Scan® enables uninterrupted communication on not just one channel, but a group of channels. If the current channel is interrupted by others outside the group, all radios in the group will automatically switch to a new clear channel allowing for communication to continue seamlessly.

With the addition of the Triple Watch feature, it's also possible to monitor two channels plus a standby channel in order to capture those all-important transmissions.

For optimum sound quality the radio is built with dual speakers in the head unit and speaker microphone with the option of an additional speaker connecting to the rear of the unit.

The built-in voice enhancer feature allows the UH9050 to choose different audio level settings (Normal, Bass, Midrange and High) to provide a natural voice enhancer for super clarity and performance.

The voice scramble function lets businesses conduct private communication by scrambling the voice signal, preventing other users, without special scrambling equipment, from understanding the conversation.

With an easy to install DIN size radio unit the Uniden UH9050 can be neatly fitted into the vehicle's dash. With a modern design and a large LCD display including 7 colour backlit options, the UH9050 is easy to use, without causing too much distraction while on the road.

**Key features:**

- 5-Watt transmission power
- Smart Mic with modern design
- Dual speakers (one in the speaker microphone and one in the base unit)
- External speaker jack at the rear the head unit to connect another speaker if necessary
- UHF & scanner in one
- DIN size for easy installation
- Master Scan®
- Large LCD screen
- Choice of 7 colours on the screen
- Triple Watch
