Uniden's enhanced Titanium 2-way radio is built to last

Uniden has enhanced the flagship 2-way CB Titanium handheld radio to include performance upgrades, along with additional car accessories by introducing the new car kit deluxe pack.

Built for heavy duty and long usage across the Australian rugged terrain, the UH850S-DLX Titanium radio has an extended battery life of 39 hours operating time (2850mAh), with a range of 17km and 5-watts - the maximum power available for any handheld radios.

The UH850S-DLX Titanium radio includes a range of car accessories to help enable flexibility and multi-purpose use. Users can switch easily between an in-car or portable solution by attaching the portable magnetic antenna to the outside of a vehicle, then clipping the handheld radio into the cradle that charges through the cigarette port enabling the handheld radio to be used as a CB mobile radio solution. The handheld radio can quickly & easily be removed from the cradle and used outside the vehicle without the need to swap to a different radio.

The portable antenna and cradle charger also allow businesses to have the CB mobile radio solution on their fleet of vehicles, without having to arrange for installation or removal each time a vehicle is renewed. Having the ability to quickly move the device into another vehicle will save businesses vehicle down time, resulting in an overall cost saving.

Voice transmissions are clearer, more natural and easier to understand with a built-in voice enhancer offering four audio settings - normal, bass, midrange and high - meaning important information can be heard first time and will less likely be misunderstood.

The UH850S-DLX has 'Built Rugged' metal rugged alloy material with a fully submersible waterproof body based on IPX7 waterproof standardsⁱ so can withstand any tough terrain or conditions that users might come across inside or outside.

UH850S-DLX key features:

- Magnetic Portable Antenna (AT820) and Cigarette Lead Battery Saver (CK850) accessories included
- 39 hours of battery operating time
- 5-watt maximum output
- Communicate to a distance of 17km
- Access to 80 UHF channels
- Waterproof
- Voice enhancer with four audio settings: normal, bass, midrange and high
- Three-year warranty

Pricing

UH850S-DLX 5-watt deluxe pack RRP \$ 329.95

ⁱ This means the radio can be submerged in one metre of water for 30 minutes without damage. The charger is not waterproof. The radio will only meet this rating if fully assembled with the battery pack attached securely. All rubber seals and sealing plugs must also be well maintained and correctly fitted.
