

June 2019

Uniden release 4K dash cam with rear camera and 4WD Jump Start Kit

Capture accurate and detailed footage in true 4K definition while driving long distance or on the daily commute using **Uniden's iGO Cam 85R**.

The latest addition to the Uniden iGO range includes ultra 4K resolution (3840 x 2160p) and a Full HD rear-view dash cam, with a 160 degrees ultra-wide viewing angle, allowing users to capture incidents 360 degrees around the vehicle in perfect detail.

The iGO Cam 85R is powered by a supercapacitor, providing a longer lifespan and wider range of operating temperatures than traditional lithium-ion batteries, making it better suited to harsh Australian conditions. It also provides enough backup power to ensure any recording in progress is stored safely before shutting the camera off.

Using the camera's in-built Wi-Fi, users can instantly upload footage direct to a smart phone via the Uniden iGO 85R app, allowing incidents to be replayed and shared immediately. GPS Geotagging and impact and motion detection technology provides accurate and detailed data, while Wide Dynamic Range captures clearer footage during night and daytime, which can be used as evidence to support an insurance claim or police investigations.

For additional peace of mind while on the road, the **UPP1000** is the latest jump start kit from Uniden providing portable power and roadside assistance.

Suitable for four-wheel drive petrol and diesel vehicles, the UPP1000 has a large start current (500A) and

peak current (1000A), jump starting petrol engines up to seven litres and diesel engines up to five litres, multiple times on one charge. It also includes smart clamp protection ensuring the vehicle's battery doesn't overload when charging.

The jump start kit can also double up as a portable powerbank allowing users to charge smartphones, tablets and other USB electronic devices when there's no access to mains power, using the USB port.

The jump start kit is waterproof with an IP67 rating, allowing users to charge vehicles safely in wet conditions and a powerful LED flashlight allows users to easily navigate when visibility is poor or attract attention on the roadside in remote areas.

The Uniden iGO Cam 85R and UPP1000 are essential items to keep in a vehicle when travelling long distance or to remote areas of Australia.

Uniden iGO Cam 85R RRP \$349.95

Available July

Key features:

- Dual camera / two-channel recording
- Ultra 4K video resolution 3840x2160p
- 2.4-inch LCD colour screen
