INTRODUCING THE LATEST IN-CAR TECHNOLOGY. Uniden's new iGO CAM is the latest in vehicle accident recording "Black Box" technology. Whether parking at the shops or operating as a professional driver, all incidents can be recorded.

3 AXIS G-SENSOR

Measures & captures G-Force impact in 3 dimensions.

IDEAL USES

- Car Drivers
- Courier Drivers
- Taxis
- Uber Drivers
- Truck Drivers
- Other Commercial Drivers

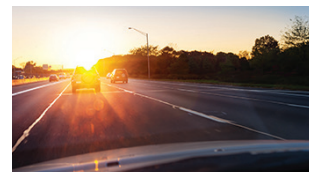

Dual Cameras – 1296p (2k) or Full HD + Full HD Rear to Record all the action on the road, behind & in front at the optimum clarity.†

Parking Mode – Gives you peace of mind when your car is parked and the engine is switched off – the inbuilt sensor detects sudden vibration triggering footage recording.*

Large Speedo Display – For easy, quick speed identification. Minimises driver distraction.

Wide Angle View 140° – Shows greater angle to capture more of the action around the vehicle.
