Enable your iPod Touch for wire-free charging with the Uniden iPod Touch Power Sleeve. Uniden Wireless Power Technology is integrated into a flexible protective gel cover ("sleeve") that fits snugly over the body of the iPod Touch. Embedded into the back of the protective sleeve is the Uniden contact module that makes electrical connection with the surface of the Uniden Wireless Power (sold separately).

(Note: The pad itself requires AC power. However, the connection between the device to be charged and the Pad can now be free from individual power adaptors.)

How Does Wireless Power Work?

Uniden Wireless Power - Drop & Charg...

Conductive Charging

Wireless Power Technology works instantaneously on the metal-on-metal contact between the pad and the sleeve or disc

Safety

The direct metal-on-metal contact allows for a very efficient and safe power transfer without generating harmful radiation, microwaves or magnetic fields.

Easy Installation

Drop & Charge, Grab & Go.

Suggested Retail: \$59.95
