Uniden has expanded its suite of in-car vehicle accident recording cameras. The Uniden iGO CAM 600 is an ultra-compact recorder with the ability to record in FULL HD 1080P and can help protect drivers from fraudulent claims and accident disputes.

Uniden iGO CAM 600 - FULL HD 10...

Uniden offers the latest in vehicle accident recording 'black box' technology. Mounted on the inside of the car windscreen, the iGO CAM 600 can automatically detect any sudden changes in car movement through its G-Sensor, such as when an accident occurs, and immediately record the footage in Full High Definition 1080P. The vehicle recorder can also loop record which continually records what is happening. This footage can then be used to provide evidence of who is at fault so that drivers can easily report incidents to police and insurance companies.

INFRARED NIGHTVISION

PARKING MODE#

What makes the iGO CAM 600 so special is the parking mode feature in which once activated , gives you peace of mind by continually recording footage when your car is parked and the engine is switched off. This option needs to be hard wired to the battery and may require professional installation by an auto electrician. The iGO CAM 600 has a 2.4" LCD Colour Screen to playback footage on and the camera lens are ultra wide angle lens ensuring all footage in front of the camera is captured.

The Uniden iGO CAM 600 can also be set up to continuously capture road vision and users can playback journeys taken. This makes the cameras ideal for recreational drivers such as 4WD enthusiasts,

MOTION DETECTION

LCD COLOUR SCREEN

parents wishing to monitor the safety of younger drivers or commercial fleet managers who seek to keep track of employees while on the road.

Packed full of state-of-the-art features, Uniden iGO CAM 600 utilises a Infrared Night Vision to ensure high quality footage is recorded even in poor light. Motion Detection enables the camera to collect evidence even when the car is parked and without the driver present - with the camera instantly capturing footage if the car is bumped or scraped. With the help of a built-in G-sensor and the device's Collision Detection Mode, the camera can also detect a change in motion which will instantly trigger recording in the event of an accident.

In the shock of an accident is it often difficult to remember every detail in order to complete an insurance claim or police report. Uniden's iGO CAM series is designed for capturing all evidence on the road, protecting drivers from becoming a victim of fraudulent car accidents or crash disputes - or for instances when your car is damaged in a parking lot. In-car cameras have also been known to help dispute unfair traffic infringements.

A plug-and-play device, the Uniden iGO CAM 600 is easy to install, configure and operate and a must for any driver.

Suggested Retail: \$149.95
